Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 47639 Concern Info There has been burning of something at a nearby property which emits very offensive and black smoke. My best guess is they are burning off automotive fluids from vehicles they salvage and maybe tires.</p> <p>The property is located at approximately 1314 Northwest U.S. 50 Highway in Holden, Missouri 64040. I have attached an aerial photograph with the property indicated on the left side of the image.</p> <p>This occurs one to two times per month.</p> <p>I am not sure of the legality of their activities but can there be something done about the emissions ?</p> <p>Comments Vegetative waste and household waste originated on-site are burned at this residential property. No evidence was found of prohibited items being burned. Appears in compliance.</p>								
KCRO	11/9/2021	11/9/2021	Keystone Church	Kansas City Jackson	Asbestos	MC		
<p>Concern No. 47867 Concern Info Asbestos was found and it doesn't seem like the abatement has been done correctly.</p> <p>Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.</p>								
KCRO	11/17/2021	11/10/2021	Church and Dwight	Harrisonville Cass	Fugitive Particulate Matter	DS

Monthly Air Pollution Control Program Detail Report Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	47869	Concern Info	?On multiple occasions observed significant amounts of dust coming from silo area while driving by Church & Dwight facility. Talking to people who have previously worked in the facility, dust collection seems nonexistent. They recount powders being strewn throughout facility- both inside and out. I couldn't be certain from the road, but it looks like there was a possible storm water outfall that uncontained powder was entering (Google Maps appears to show some sort of trench near silos as well). Facility definitely seems out of compliance					
Comments	At the time of investigation no violations were found.							
KCRO	11/16/2021	11/16/2021	Blue Nile Contractors	Birmingham Clay	Open Burning	CK		
Concern No.	47876	Concern Info	Dumping of plastic water pipe and burning it last night already today they have another large pile ready to burn problem on it starts getting dark last night. I have sever COPD and the smoke was horrible.					
Comments	Birmingham Fire Chief states that fire was an accident and will notify the Blue Nile ex-employee of the state regulations to stop further open burning and provide regulatory information.							
KCRO	11/18/2021	11/16/2021	ZMDR Facility	Lone Jack Johnson	Odor	JH		
Concern No.	47877	Concern Info	Around 2:30 pm the odor was horrible n nw 800 rd between 1971 rd and 1941 rd					
Comments	The concern was received late in the day. The weather for Wednesday is the wind from the N. On the November 18th site visit, No odor violation since the odor dissipated

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	11/18/2021	11/16/2021	ZMDR Facility	Lone Jack Johnson	Odor	JH		
Concern No. 47878 Concern Info Horrible odors around 5:30-5:45 am NW 800 to NW 1901 Rd								
Comments The concern came late in the day. The winds on the 16th were from the SSW. The winds for the 17th is to be from the N. On November 18th Investigation no odor violation since the odor was light and dissipated								
KCRO	11/23/2021	11/22/2021	Jonathan Roberts	St. Joseph Buchanan	Open Burning	DS		
Concern No. 47977 Concern Info Jonathan Roberts was burning tires and wires at noon on Sunday 11/21/21 at 3590 SW Lane Road in St Joe. The fire caught the woods in the neighborhood on fire. The smoke had a burning plastic or rubber smell. The smoke started as black until it caught the vegetation on fire. Mr. Roberts mother (Judy Christianson) owns the property.								
Comments At the time of investigation no violations were found. Fire appeared to be accidental and to have originated from a neighboring property. Cause and source were not able to be identified

Concerns Investigated Between
October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 47961 Concern Info How often are codes checked such as air quality or sound ordinances checked. It sure seems like some days that the noise and dust from AA Quarry are excessive. AA Quarry, LLC is close to me and I was wanting to know if they were mining correctly within their codes. How close can they get to my property line and AA Highway? How much explosives can they use on a blast??								
Comments Only minimal dust was observed during the site visit, and I did not see any violations; however, I did see some track-out onto AA Highway. No blasting occurred while I was in the area.								
KCRO	11/29/2021	11/29/2021	Pied Creek Pumping Station	Kansas City Platte	Odor	MC

Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 47971								
Concern Info			nline odor concern form submitted 11/28/2021 at 10:58 p.m.					
			Experienced Odor Date and Time: Sep 24, 2020 [sic?] 10:54 pm					
			Experienced Odor Duration: Currently experiencing the odor					
			Experienced Odor Description: Rotten Eggs, Rancid or Rotten, Sewer					
			Experienced Odor Intensity: Strong or Offensive					
			Experienced Odor Address and/or Location Description: 6711 northwest Eastside dr Kansas City Missouri 64152					
			Potential Source: It's all through the neighborhood and I'm not sure?					
Comments			While this concern is outside the city limits of Kansas City, Kansas City Air Quality (KCAQ) volunteered to investigate the concern. KCAQ went by the location, but did not detect any odor					
KCRO	12/2/2021	12/2/2021	Unknown	Smithville Clay	Fugitive Particulate Matter	JS		
Concern No. 47982								
Concern Info			Caller is concerned about the large amount of dust from the gravel road their house is on. She stated that the last few year it has gotten much worse due to a new facility, which she believes is a Kansas City water treatment facility, being built at th end of the road and more than 20 trucks per day using the gravel road to get there and back. She said the dust is affecting the health of the residents in the area, as well as damaging home ac systems and vehicles.					
Comments			Concern appears to be unregulated by the Department

KCRO	12/2/2021	12/2/2021	Ideker Mosby Asphalt Plant	Excelsior Springs Clay	Fugitive Particulate Matter	MC		
Concern No. 47983 Concern Info From an NRC report: Caller stated that a nearby asphalt company is releasing unknown material resulting in the release of white smog over a large local area. Caller states that the smog has a very strong foul odor.								
Comments A site visit was conducted, but operations had ceased. No issues were observed. Further surveillance will be conducted in response to concerns.								
KCRO	12/3/2021	12/2/2021	Unknown	Jackson	Other	MC		
Concern No. 47985 Concern Info oicemail received December 2, 2021, at 3:46 p.m.: This is Susie Blood (B-L-O-O-D). My number is 816-885-7080, and I want a cease and desist on these chemtrails that have been laid down all over my area all day today. I'm in the Kansas City area / Lee's Summit area of Jackson County. These are toxins being released into our atmosphere. I've seen what's done to the Europeans with headaches, respiratory problems, cancers. These toxins that are being put out into the environment, supposedly to help climate change, are going to come down in our open waters, on our farm lands, on our trees, and on the citizens. I think Missourians need to be informed and allowed to vote before these chemtrails continue. I've taken pictures. I think it's ridiculous. It needs to stop, and I may go as far as you know, have some legal action going here because this is, this is an atrocity. Thank you.								
Comments Concern is in regard to mobile source emissions across multiple jurisdictions. EPA has also provided factsheets and information on the formation of contrails. Concern was referred to EPA.?

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48011	Concern Info	A company purchased former Seba property near 247th (State Route Y) and Prospect (between Cleveland and Beyer Crushed Rock quarry-west and south of peculiar) and they have been spraying or land applying something that leaves a di on everything outside and the concerned party gets a headache. There is also a strong musty, yucky odor. The CP believe Suburban Lawn purchased the property (there are a lot of properties previously owned by Seba Bros Farm in the area) , TI CP said their neighbor know more about the location where the spraying is occurring. I gave them the field activity number they or their neighbor can call and provide or obtain more info about the investigation. I did explain that sometimes there's limited things the Department can do when it comes to agricultural activities. If we cannot do anything, they would like to know where they can go for help. Mostly they want to know if whatever is being sprayed, is safe					
Comments	No violations were observed. Appears to be an agriculture activity related to the growing of crops.							
KCRO	12/13/2021	12/8/2021	Steve Lockhart	Odessa Lafayette	Other	JS		
Concern No.	48065	Concern Info	Smoke from outside furnace or incinerator runs almost constantly. At times makes the entire neighborhood foggy with foul smelling smoke. Often has bad odor. Animals that go outside will smell of smoke even if out only a few minutes, so do people and their clothes. Anything cloth you keep outside will reek of smoke from this. It is in back yard of property's South from I70 onto 2nd Street, left on Main St, left on N. Wells, house on right?and smoke is exhausted at only about 6 feet abo ground.					
Comments	Smoke was being generated by a residential wood-burning furnace. No violations were observed during the investigation.							
KCRO		12/9/2021	Gary Griffin	Amazonia Andrew	Open Burning			

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48076	Concern Info	Received a joint call from the Fire Chief of Savannah Rural Fire Protection District and Emergency Management Director of Andrew County. They reported they had a property owner (Gary Griffin) located at 18102 County Road 393 in Amazonia where the fire department had responded approximately 6 times in 2021 having to put out very large fires. Fire Chief stated that reports a photos of past incidents can be provided to the department. Explained that they needed help with this issue and were reaching out to DNR to see what regulations for these type of issues would apply. Stated that property owner had a business where he picks up other people's waste. States the truck says something like "Same day Hauling" and brings it back to his property and is burning it. Stated that just yesterday the fire department responded and had to put out a trailer house fire but that appeared to be related to alcohol and domestic issues with his female companion/wife?. Stated that if DNR does go out to the property, we should ask for one of the local agency representatives to accompany us Note: Open burning regulations were provided to the concerned parties per email. (Fire chief for Savannah Rural Fire District and EMD of Andrew County)

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between October 16, 2021 and December 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 47659	Concern Info Online report received Oct 25 at 9:29 AM: Date first noticed - October 23, 2021. I have reason to believe people are using piece of property as a garbage dump. I have witnessed people burning trash there. The property had been vacant for a very long time but now someone is living in the shed that is located on the property. My father-in-law, who also lives near this property, talked to a person who was going to dump a vehicle full of garbage there. This person collects garbage for a living what they told him. He told this person they could not dump there and they drove off. Since then I have noticed a few piles of burnt trash in front of the shed. I believe they are using this property as a garbage dump which concerns me. I don't know if the person who is living in the shed owns this land or if he is renting it. I live at 8945 N Brown Station Road in Columbia, and this property sits at the end of my driveway. I don't know if this shed has an address because it has been vacant for so long. I would really appreciate it if someone would look into this. ?							
Comments	Violations of the Missouri Solid Waste Management Laws and Regulations, and the Air Conservation Commissions Regulations, were determined. At the time of investigation, Jodey Stuart had dumped regulated solid waste onto the surface of the ground, consisting of mattress springs, insulations, a chair, carpeting, ceiling tiles, a catalytic converter, a ceramic bowl, lumber and scrap wood, scrap metal, a television, wiring, a blanket, a slipper, and other miscellaneous wastes. Jodey Stuart also burned, or allowed the burning, of regulated solid waste, consisting of mattress springs, insulations, a chair, carpeting, ceiling tiles, a catalytic converter, a ceramic bowl, lumber and scrap wood, scrap metal, and other miscellaneous wastes. A LOW will be issued to Jodey Stuart for the violations determined. Jodey Stuart will submit a signed Air Pollution Violations Acknowledgement to the Department.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 48009 Concern Info Caller states that Austin Wasson recently purchased a mobile home park in Bowling Green and burned one dilapidated trailer for disposal after the fire chief and code enforcement both told him not to burn it on separate occasions. Caller stated that he burned about 1/4 of the trailer in a pile, then when the fire department asked him not to he had said he had permission from code enforcement to burn, but code enforcement arrived and said the opposite. Caller said that following that conversation he had burned the rest of the trailer. Caller said that it doesn't look like any other trailers will be demolished here.</p> <p>Comments Issue a Letter of Warning for violation of the Missouri Open Burning rule. Require that the waste ash be cleaned up and taken to the landfill. Also will require a response letter.</p>

SERO	11/1/2021	10/29/2021	Ms. Crosby	Fisk Butler	Open Burning	DB		
<p>Concern No. 47698 Concern Info SP:31145 ?Mr. Crosby, who lives at 607 3rd Street in Fisk is burning scrap from an old mobile home (that already burnt down) The owner of the burnt trailer said he could keep the scrap metal that he could get out of the trailer and Mr. Crosby is burning it rest.</p> <p>Comments ???I arrived at the property and gave Ms. Crosby (Mr. Crosby's mother) my business card. Mr. Crosby's mother rents the property, she didn't provide first name. A trailer had recently burned down behind her property and she's burning wood from the remains of the trailer that lay in her yard. The owner of the trailer supposedly gave her permission to do as she wishes with the remains of the trailer. Another anonymous individual I spoke with told me the owner of the burned trailer is cleaning up a lot of the debris. I informed Ms. Crosby that the wood needs to be untreated in order to burn it in accordance with the Code of State Regulations, 10 CSR 10-6.045 Open Burning Requirements. For any treated wood or other remains of the trailer, it needed to be taken to a transfer station or landfill. I gave Ms. Crosby a few fact sheets/ publications and told her to contact me if she had any questions or concerns in the future.</p>								
SERO	11/1/2021	10/29/2021	Josh Plant	Fisk Butler	Open Burning	DB		
<p>Concern No. 47699 Concern Info SP:31144 ?Josh Plant at 112 3rd Street in Fisk is burning. He keeps a huge pile of trash and is burning. He hauls in junk for scrap and burns what he cannot use. This burning causes black smoke that irritates the Concerned Party.</p> <p>Comments I knocked on the door several times and no one answered. I did notice a lot of trash and debris in the yard along with a few dogs, but I couldn't see any stand-out signs of anyone open burning on the property.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 47957 **Concern Info** SP:31247

?Concerned Party alleges that TG Missouri is emitting an odor that smells like acetone. The concerned party lives in the Perryville area approximately one half mile from TG Missouri. This chemical odor is especially noticeable whenever the wind is out of the northeast and that is also downwind of TG Missouri Corporation, per the caller.

Comments This investigation took place from 9:21 a.m. to 11:04 a.m. The Temperature was 60-62 degrees Fahrenheit, the windspeed varied from 9-10 mph and the South to South Southwest. The Barometric Pressure was falling (starting at 30.05 inches and ending at 30.03 inches). Odors noted were faint and included gasoline from near MFA Oil on Industrial Drive, Mary Lee Gilster (food) odor near the Industrial Park on Walters Lane, and a wood smoke odor near the Industrial Park along Highway 51. No acetone odor was noted.

Observations took place from 9:29 to 9:46 a.m. along Walters Lane and Corporation Lane; from 9:46 to 9:59 on Highway 61 north to PCR 900 to State Route V to State Route AC to Hwy. 51 and back to 61 north; 9:59 to 10:15 along Walters Lane and Corporation Lane; 10:16 to 10:23 on Highway 61 north to PCR 900 to State Route V to State Route AC to Highway 51 and back to Highway 61 north; from 10:23 to 10:44 along Walters Lane and Corporation Lane; 10:44 to 11:02 61 north to PCR 900 to State Route V to State Route AC to 51 Highway west. Observations ended at 11:04 a.m. and left the Perryville area.

I spoke with Dylan Carpenter by telephone on November 16, 2021. He stated that he has purchased a weather station to assist with odor surveillance TG Missouri. Dylan Carpenter did not know of any upset or malfunction conditions at TG Missouri around the timeframe when the environmental concern was received.

SERO	11/15/2021	11/10/2021	Unknown	Cape Girardeau	Fugitive Particulate Matter	JD		
Concern No. 47934 Concern Info SP:31303 ?The dust coming from the quarry has been extremely bad and the CP doesn't believe they are watering. The highway is covered in white dust as well and is lowering visibility on Hwy 61.								
Comments ?Base Rock Minerals have a 2000 gallons water truck utilized when they are producing product. The water truck is utilized at least 2 times each day during episodes of high wind volume or hot weather they utilize the truck up to 6 times per day. During the last few days they have utilized the truck 2-times each day depending on truck traffic and the need to water the yard. photographic evidence and a water log is recorded each time the truck is utilized.								
SERO	11/30/2021	11/29/2021	Base Rock Quarry	Jackson Cape Girardeau	Fugitive Particulate Matter	JD		
Concern No. 48050 Concern Info SP:31436 ?CP states the dust from the quarry is very bad today. CP states this is the 2nd concern for this site. CP is worried the RP is not watering like they should.								
Comments Base Rock Minerals utilizes a water truck for the quarry, the asphalt and concrete plants. During the investigation adequate water was being applied to the haul roads. The facility is going to pressure wash the paved (entrance) portion of their haul road prior to shut down to remove any debris collected the haul road. This will decrease the potential for mud and dirt being carried out of the facility on truck tires, Dust was not leaving the property at the time of the investigation.

Concern No. 48059 **Concern Info** SP:31476

?CP states there is an empty lot across the street from the 221 block of Roberts Ave. in Lilbourn that the RP has been burning tires and other material on. CP states they believe a house was torn down and burned on this property. CP states there is other construction material on this lot such as linoleum flooring. CP states the city has sited the RP before for illegal burning. CP states they have body cam footage and pictures they can send if necessary. Please call the CP for directions and video/photos.

Comments ???I arrived at the location of where the open burning was supposedly taking place prior to meeting with anyone. From the road I saw a lot of trash and debris. Further back I could see a pile of trash with some of it looking as though it had been burned at some point in time. From where I stood, it all looked like random junk such as televisions, cinderblocks, trash, etc. I met with the concerned party who told me where the responsible party lived. I gave the concerned party my business card and told him to contact me if he ever had any other concerns or questions. I then tried knocking on Mr. Glover's door, but no one answered. I left a few publications/fact sheets as well as my business card inside the screen door to his house.

The fact sheets/publications I left for Mr. Glover were:

Facts on Open Burning Under Missouri Regulations - PUB2047

Management of Scrap Tires - PUB2056

Illegal Disposal of Construction and Demolition Wastes - PUB2251

10 Code of State Regulations 10-6.045 - Open Burning Requirements

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments On 12/6/21, I left a voicemail for Mr. Jones to call back. I also visited the reported site.								
Upon arrival, Jesse Evans and I came to a gated driveway at the property. From the gate, tires were visible as part of the extension of the gate to the property, in addition to surrounding the north side of the gravel driveway leading to the residence. Tires were visible on the sides, front, and behind the residence of the property. From the roadside, it appeared that the site had approximately 1,000 tires, including passenger tires and semi tires. A voicemail was left for the referenced responsible party, Casey Jones, regarding the site investigation.								
On December 8, 2021, I talked with Marion Hicks, property owner, regarding the site conditions and relationship to Mr. Jones. Mr. Hicks advised Casey Jones was in the process of purchasing the property, rent to own, but that the business transaction had ended. He stated another potential buyer was looking at the property for ownership. Mr. Hicks advised he was aware of the storage of tires, but that Casey Jones was to be in the process of removing the tires. I discussed the site conditions and advised the concerns of using the property for the storage of tires and potential reported burning of tires.								
On December 10, 2021, I was able to make contact with Casey Jones. Mr. Jones stated that his intention for the property was to use the tires for the construction of exterior walls of a building he planned on constructing. His plans were to purchase the property, but advised that apparently the property was in the process of being sold to another individual. He advised that he had been receiving scrap and used tires from around the surrounding area. He advised that no further efforts in bringing tires to the property should be conducted without a prior meeting at the property to discuss the site conditions. Mr. Jones agreed to a meeting at the property on December 15, 2021.								
On December 28, 2021, I was able to reach Mr. Jones via a phone call. He stated that he wasn't doing any work at the site and that he only brought approximately 200 tires to the site, and that someone else had brought the rest of the tires. He also stated he never burned any tires. I advised him he would be receiving a Letter in the mail stating my investigation report. I advised him not to remove any tires unless he could provide disposal records, and not bring any more tires to the site.								
I also talked with Margaret Gibson. She advised that they had not been performing any efforts at the site either.								
On December 29, 2021, Nikke Barks advised that she is the prospective property owner of the site. She advised that she hired an individual to move the tires for access to the property. She stated that she was looking at closing on property on December 30th. I advised potential liability associated with purchasing property with tires. She stated she would not remove or deposit tires on the property.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 48099 Concern Info SP:31600 ??The Responsible Part (apparently the Scott City Mayor and Fire Chief) allegedly is demolishing a structure in a residential neighborhood with suspected asbestos siding, roofing, etc. The address of the incident is 343 Wright Street in Scott City. Additionally, it is alleged that the Responsible Party will often burn tires on his property and permits himself to do so as Fire Chief, calling it a controlled burn.</p> <p>Comments I researched the street address in Scott City and failed to find a street location. However, I did locate a Wright Avenue in Chaffee. I proceeded to Chaffee but I failed to find a 343 Wright Avenue. I drove on to Scott City and since I was still unable to find Wright Street, I went to Scott City's City Hall. I was informed that the Mayor is Norman Brant and the Fire Chief is Shawn Jackson. I picked up a street map at City Hall and failed to find Wright Street or anything similar. I then called the Concerned Party and I was informed that the location is actually Stotts City in Lawrence County Missouri. Additionally, I was told by the Concerned Party that he had telephoned and had given locational information including the zipcode to a lady at US EPA Region 7. The Concerned Party stated that he has video of the tire fire(s). He believes that approximately 980 tires have been open burned.</p> <p>While in the field, I forwarded the e-mail information to Tanya Turner at the Southwest Regional Office.</p>								
SERO	12/13/2021	12/10/2021	Royal Oak-Summersville Plant	Summersville Shannon	Fugitive Particulate Matter	JD		
<p>Concern No. 48127 Concern Info SP:31599 ?Concerned Party states that in the evenings there are emissions, maybe charcoal dust but likely some kind of particulate matter, that are coating his vehicle and his cabin. He says it is only happening at night. He goes out at night with his head lamp or with a flashlight and can see the particulates in the air. (Richard Swartz told him that one of us would contact him to schedule an investigation.)</p> <p>Comments Royal Oak Charcoal is loading fines into dump bed trailers with a front end loader. The loader is causing dust to become air borne during the loading on the haul road and while dumping into the trailer. During the investigation I did not observe dust leaving the property the wind was 0-1 mph. ?</p>

Concern No. 48204 Concern Info SP:31617 ?CP states RP is burning toxic items. CP states there is a large black cloud and heavy fumes in the area. CP states the fumes smell like burning plastic or fiberglass.								
Comments ?????At the time of this investigation, no open burning was observed. There was no one at home. I noted the address and did some online research to find the information on the Responsible Party, William Fields. Mr. Fields was contacted by telephone on December 23, 2021. Mr. Fields stated that he had been trying to clean up the property and was removing a large amount of scrap metal, clearing brush, cutting trees, and open burning the wood waste, previously. However, no additional large-scale open burning is planned. Mr. Fields stated that he received my business card, and a copy of the fact sheets (Facts on Open Burning Under Missouri Regulations and Managing Construction and Demolition Waste) and the air regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements. Mr. Fields further stated that he would be careful to comply in the future by burning only untreated wood wastes and household trash.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 48216 Concern Info SP:31636 ??Raw material is loaded outside. Spilled on the ground. When it rains it runs into the ditch southeast of plant. Inside plant there is an environmental concern with water. Plant manager is aware. Dust collection systems are not working all the time large amount of dust inside plant causing employees to wear respirator. Dust drift several miles getting on other buildings and vehicles. Doors are open to let dust out which is not allowed. Raw material in the DC building is washed down an outs drain. Not supposed to happen.</p> <p>Comments Verdesian Life Sciences routinely changes the bags/cartridges in the baghouses. They are reading the magnahelic gauges several times per day. There are a total of 10 baghouses located throughout the facility. Last routine bag change and partial changes were reviewed and documentation was provided for review. Floor sweep waste is collected and pickup by Inter-rail Systems for disposal. Documentation provided for review This waste has been determined to be non-hazardous waste. Respirator use in the plant is a plant wide company requirement for employees working continuously inside the plant. All visitors are required to wear a dust mask to enter the facility. All outfalls are routinely tested and reported on DMR. Doors are opened routinely for loading and unloading transport trucks. However, the facility is reviewing practices and the potentials for dust leaving property boundary. The facility is considering incorporating building wide dust control to prevent the potential of dust leaving the property boundary. This could be incorporated into the next routine construction permit application. During the investigation no dust was observed leaving the property boundary.?</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 47805 Concern Info Mr. Lamby contacted the SLRO about a concern regarding his neighbor spraying copius amount of rat poison over the last year or two. Mr. Lamby said that his neighbor sprays the poison and drops rat poison pellets around his (the neighbor's) house and yard. Mr. Lamby believes that the poison is also coming into his own yard and is causing issues with his lawn care. The concerned party claims that the rat poison is seeping into the groundwater. Mr. Lamby said that he has previousl tested the water and claims it confirmed the poison was polluting the water. He stated that he has noticed a significant drop in the amount of wildlife in the area over the past year, and believes this is due to the poison. He also stated that one of his dogs has recently passed due to rat poisoning, and is worried his current dog may suffer from poisoning as well. Mr. Lamb has taken video of the neighbor spraying and releasing of the rat poison. ?</p> <p>Comments The citizen was very worried about his pets and that his neighbor may be intentionally poisoning them. Also about his drinking water. I provided the citizen with resources to report the pesticide misuse to the Missouri Department of Agriculture, sent him the consumer confidence report for his water provider and their phone number if he had further concerns about his specific tap water. I told him to contact me with any further questions.</p>								
SLRO	10/28/2021	10/25/2021	Unknown	St. Charles	Odor	LZ		
<p>Concern No. 47787 Concern Info Symptoms of sudden onset of incontrollable coughing, Shortness of breath, Decreased lung function, Pain and burning in both Eyes which makes it hard to open my eyes, Congestion. Can't breathe. I've noticed a very Strong Odor which I starter tracking on 8/19/2021 due to the severity of my symptoms and noticed the odor usually starts on thursday or friday and continues through Sunday. Is it a nearby business that is burning. Recycle business nearby, or somebody has a meth lab? don't know, but I am diagnosed with COPD, and also extremely allergic and sensitive to chemicals. My neighbor smokes, which is also affecting my health. This odor is very concerning to me and causing me some serious reactions.</p> <p>Comments ?I visited the location in the PM hours of October 28, 2021. From Midrivers Mall Drive,I drove east to St Peters Recycling Cneter on Ecology Drive. Walked arround for a couple of minutes. I went back to Didion ORF Recycling facility located south of the recycling center. I then drove on Salt Lick Road further north. I walked outside. Stayed in the area for about one hour. Wind was calm on a cloudy day. There was no odor objectionable to me a the time of my visit.</p>

SLRO	11/9/2021	11/3/2021	Anheuser Bush LLC	St. Louis City	Odor	LZ		
<p>Concern No. 47778 Concern Info ?Strong or Offensive on Nov 3, 2021 9:00 am for more than 2 hours. On this day, we had 2 asthmatic attacks and numerous student and staff illness.</p> <p>Comments I visited the area on November 9, 2021. The provided address 2516 S 9th street, is Humboldt Elementary School at the corner of 9th street and Victor. The caller could not be reached at the provided phone number (314 932 5720). There was no odor I could smell around 7th , 9th street. I tried to reach the caller to help me identify the source of odor. My call was not answered.</p> <p>I asked Lauren Kanallakan, Environmental Manager at Anheuser Bush (AB) to find out if any one at AB noticed such an odor on that day. After talking to various departments, she told me that there was no activity of any kind that is different from the normal process that would create such an odor on that day.</p> <p>I drove around AB all the way east to the waste water treatment plant where AB has a biogas generation plant. No odor was detected. I talked to the school principal (Ms. Belinda Qumby) at the same phone number. The school principal told me that as she comes in to her office that day, she noticed that the students were not outside during their normal morning break time.</p> <p>She was told that it is because of bad air quality/pollution in the morning. The principal checked the air quality on the website. It was moderate. She told me it is likely that the caller noticed odor from beer grain husks and decided to let students go inside the school building assuming this may trigger an asthma attack on students with asthma (there are few students with asthma she added). However, Ms. Quimby told me that this is no reason to submit an odor complaint and everything is just fine.</p> <p>I provided details of my complaint investigation to Lauren Kanallakan (AB) assuming it might help AB to deal with similar future complaints from residents in the area. I told her that I would rather have citizens call AB directly than submit a complaint to us. They can always talk to citizens who may have issues and resolve concerns quickly.</p>

Concern No.	47989	Concern Info	Anonymous call recieved from one of the home owners regarding open burning of non vegatative material by a subdivision resident. The material was alleged to be carpet material. It is alleged that the individual runs a business from his home.					
Comments	11/15/21							
<p>?I spoke with John Mullen, who recieved the concern. He mentioned that the concerned person has already contacted the fire marshall and the subdivisision's HOA/Board of Trustees regarding the matter. I will be allowing ample time for these agencies to take action. The fire marshall will be reaching out to Mr. Mullen about their invesitigation, and Mr. Mullen will be forwarding me the information he recieved. Mr. Mullen gave the concerned party the information for Jefferson County Department of County Services and Code Enforcement, so the concerned party can contact the county enforcement about the issue. I contacted Jefferson County Department of County Services and Code Enforcement to see if they recieved the complai and ask what actions they will be taking. They informed me that they have not recieved the concern, and that the concerned party will have to contact their office to pursue further action. I also contacted Jefferson County Division of Solid Waste, and notified the agency of the concern. The represental for the Division of Solid Waste said that they will also have someone from their agency invesitigate the issue and see if there is any violations occuring an investigation is still required, I will be visiting the property at the earliest on Monday, November 22.</p>								
<p>?11/24/21</p>								
<p>I visited the property at approximately 12:30pm. From the street I was not able to see any open burning taking place, or the alleged area where the burning had been occuring. I left a copy of 10 CSR 10-6.045 "Open Burning Requirements" on the mailbox to the property. At this time, neither John Mullen or I have heard anything from the Fire Marshall, the subdivision's HOA/Board of Trustees, or the Jefferson County Division of Solid Waste.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48263	Concern Info	From Amber Foott, 3/5/21: "I received a call from David Hicks, 314-607-3125, regarding his neighbors burning tires and rubber, and scrapping vehicles and appliances in their yard. The caller claims they are armed, and advises us to call Linco County Sheriff's Office if we go onsite. The property is at the end of Madden Rd next to the Cuivre River. With the proximity the river this may involve WPC as well."					
			From Amber Foott, 11/30/21: "I am not sure how far Tom took this, but the CP called again yesterday. Would you mind taking a look at this and letting me know what you think please???"					
Comments	11/30/21 N o previous investigation was done that I could find. I spoke with the concerned party this morning. He wanted to remain anonymous out of retaliation from the neighbors. He said the individuals at this property (he believes its 393 Madden Road, north of Troy) conduct a salvage operation and burn the interiors of vehicles, tires, and other refuge once a week or more. He's concerned about debris getting into the Cuivre River. He said the police have a rap sheet on these individuals and they should be considered armed and dangerous. The fire department was out there several years a when they apparently started a small forest fire.							
	The concerned party gave me contact information for Lieutenant Kevin Eulinger with the Department of Conservation (636-358-6180), and explained t Lt. Eulinger is aware of the situation and has been out there several times, but directed the concerned party to contact us because the most he could i was 'issue tickets for littering.'							
	11/30/21 I spoke with Lt. Eulinger, who confirmed that the real problem property here is 373 Madden, homeowner is Jeremiah Kersting. 393, and adjacent properties are owned by Jeffrey Williams and are between 373 and the river. Lt. Eulinger did not believe this property is a problem, which provides a good buffer between the burning and the river. I spoke with Myron Lewis and Joe Trunko and we decided that the best course of action, giv the safety concerns, is to send a letter and fact sheets to the homeowner to provide compliance assistance, and offer to speak with them more.

Concern No.	48259	Concern Info	??Caller reports that their neighbor has burned a large pile of roofing shingles in their front yard, near the road. This is the time they have done so, as far as they are aware. Burned overnight on 12/1/21. Located on Wolf Creek Road, north of Troy. Caller is unsure of exact address, but said that you will see the burn pile on the way to 39 Wolf Creek Road.?					
Comments	<p>I drove towards 39 Wolf Creek Road as specified within the concern. Before arriving, approximately 420 ft south of Our Kids Lane, at approximately 2: pm, I approached what looked to be a pile of roofing shingles as described within the concern. The pile was located right next to the road and directly the East. I parked the car on the side of the road, exited the car, walked closer, and noted that the pile appeared to be approximately 3 feet high, 10 feet wide, and 15 feet long containing primarily shingles with the addition of various plastic bottles, gloves, and black plastic bags. Some of the shingles appeared to be blackened from a previous burn and I observed a distinctive smell of something burnt next to the pile (Photograph #1). While standing next to the pile and on the road, I took the GPS Coordinates, which read 15 S 0715842, UTM 4240845, and took several photographs of the pile.</p> <p>While observing the pile, a neighbor approached me to speak regarding the shingle pile. The preferred to remain anonymous, but stated that he and his family observed two men from 100 Our Kids Lane burning the pile for 3 nights in a row and that the pile is on the 30 foot road easement (it is notable to mention that Wolf Creek Road is a private road), which is located on 100 Our Kids Lane property.* He informed me that the men at 100 Our Kids Lane moved in several months ago, and pretty soon after, began working on the house roof with no end in site. He also mentioned that the house is covered with tarps. The neighbor also stated that he spoke with another neighbor who spoke with one of the men who lived at the source of the concern address who informed that neighbor that he was a contractor. I informed the anonymous neighbor that I will provide the house with fact sheets regarding what allowed to burn and then he departed from the location.</p> <p>At approximately 2:52 pm, I approached 100 Our Kids and knocked on the door twice with no answer. I then left a copy of "Facts on Open Burning Under Missouri Regulations - PUB2047" and "Managing Construction and Demolition Waste - PUB2045" as well as my card next to the door and then left the premises.</p> <p>*I confirmed after the site visit, via parcel viewer, that the pile is on 100 Our Kids Property.</p>

Comments Two concerns were submitted within several days of each other regarding the same shingle pile. As such, they were investigated as one concern.

I drove towards 39 Wolf Creek Road as specified within the concern. Before arriving, approximately 420 ft south of Our Kids Lane, at approximately 2: pm, I approached what looked to be a pile of roofing shingles as described within the concern. The pile was located right next to the road and directly the East. I parked the car on the side of the road, exited the car, walked closer, and noted that the pile appeared to be approximately 3 feet high, 10 feet wide, and 15 feet long containing primarily shingles with the addition of various plastic bottles, gloves, and black plastic bags. Some of the shingles appeared to be blackened from a previous burn and I observed a distinctive smell of something burnt next to the pile (Photograph #1). While standing next to the pile and on the road, I took the GPS Coordinates, which read 15 S 0715842, UTM 4240845, and took several photographs of the pile.

While observing the pile, a neighbor approached me to speak regarding the shingle pile. The neighbor preferred to remain anonymous, but stated that he and his family observed two men from 100 Our Kids Lane burning the pile for 3 nights in a row and that the pile is on the 30 foot road easement (it is notable to mention that Wolf Creek Road is a private road), which is located on 100 Our Kids Lane property.* He informed me that the men at 100 Our Kids Lane moved in several months ago, and pretty soon after, began working on the house roof with no end in site. He also mentioned that the house is covered with tarps. The neighbor also stated that he spoke with another neighbor who spoke with one of the men who lived at the source of the concern address who informed that neighbor that he was a contractor. I informed the anonymous neighbor that I will provide the house with fact sheets regarding what is allowed to burn and then he departed from the location.

At approximately 2:52 pm, I approached 100 Our Kids and knocked on the door twice with no answer. I then left a copy of "Facts on Open Burning Under Missouri Regulations - PUB2047" and "Managing Construction and Demolition Waste - PUB2045" as well as my card next to the door and then left the premises.

*I confirmed after the site visit, via parcel viewer, that the pile is on 100 Our Kids Property.

Concern No. 48261 **Concern Info** Online concern form:

Date of Incident or Date First Noticed
12/01/2021

Please describe your concern, including the location on the property.
A person in our neighborhood is burning used telephone poles which contain creosote on his property. The burn site is located near a tributary to Bob's Creek. The neighborhood is concerned for the water, and air quality. Could you please check this out? THANK YOU!

Comments 12/8/21 I looked up the address on Missouri Parcel Viewer. The alleged property is 3377 Deer Run Lane, owned by John and Kimberly Grzyb.?

On 12/10/21 I visited the site. I was accompanied by Miranda Cason. We did not see any burning taking place at the time of the investigation. We did notice a small burn pile near the road, but only saw what looked like untreated wood in the pile. I turned into the driveway and drove to the end so I could get a better look at the trailer in the back of the property. I could not see any burn piles from the driveway. I did not see anyone at the property at the time. I waited a moment to see if someone came out. I did not knock on the door due to the anonymous nature of the concern, we did not know if the owners had a history of violence.

Concern No. 48262 Concern Info Ronda Caswell called to report a concern regarding Kimaterial Inc. The concerned party stated that Kimaterial was tearing down trees near the Street of Fort Howard Acres off of Highway 79 across the train tracks. This action was creating intrusive dust, odor, and sound. Ronda was upset by this and wanted quick action to be taken. Comments Upon investigation, there was no dust violation seen or odor observed in the area between and around 94 Fort Howard Acres and the Kimaterials facility. It appeared that trees were being cleared on a private residence. I called Ronda Caswell and left a message explaining that I did not observe a violation.

Comments	<p>This is the second concern report by the concerned party, the first was on 12/3/21. At that time, I sent the concerned party the following e-mail:</p> <p>"Hello Erin,</p> <p>I'm the air pollution supervisor with the Missouri Department of Natural Resources, St. Louis Regional Office. I received your concern regarding strong odors in the Fox Park area. We have received many similar concerns in this area, and have been monitoring the facilities on the Missouri side of the river. Based on our current information, it is most likely that the odors are originating from Veolia Environmental Services in Sauget, Illinois. This facility is regulated by EPA Region 5. We will create a log of your concern, but recommend you contact EPA Region 5 and report the odors directly to them.</p> <p>You can contact EPA Region 5 at r5hotline@epa.gov, at 312-353-2000, or by submitting an online concern form at https://echo.epa.gov/report-environmental-violations.</p> <p>If you believe the odor is coming from a specific facility on the Missouri side, please let me know and we will investigate that facility."</p> <p>On 12/13/21, I sent a follow-up:</p> <p>"Erin,?</p> <p>We have received another concern from you, forwarded by EPA Region 7. Please let me know if you have followed the steps below to report the odor to the EPA Region 5, as they are the regulatory authority over Veolia Environmental in Illinois, the likeliest source of this odor. If you believe the odor is coming from a Missouri facility, please let me know so we can investigate. However, we have thoroughly investigated the area on the Missouri side of the river in the past, and have not found a likely source for this odor.?</p> <p>Please let me know if I can help out any further,"</p>

Concern No.	48254	Concern Info	?Caller explained that the City of New Haven was demolishing a home on Hwy 100, and that no asbestos/lead inspection was done prior to demo. I explained that normally single family homes were exempt from NESHAPS but if it was part of a city project, it would be regulated.?					
Comments	<p>I contact Kathleen Trentmann, City Administrator for the City of New Haven. I explained that we recieved a concern about the demolition. She confirm the address and said that they did not think they needed to have an asbestos inspection because it was a single family residence. I said that usually, since cities often demo multiple properties a year, they are considered part of one project and fall under NESHAPS. She told me that this is the only home the city was demoing in 2021, and the only one she could remember ever demoing. I said I would double check and follow up with her.?</p> <p>I spoke with Stan Payne, Asbestos unit, APCP and he confirmed that if a city was only demoing one home in a calendar year, then they were exempt.</p> <p>I followed up with Kathleen to let her know they could continue demolition since they were not regulated by NESHAPS.</p> <p>I called Leland Hanks back and explained the exemption. Leland said the city had demo'd other homes, but they sold them first. I explained that ownership at the time of the demo is what mattered. Leland had concerns about lead in the property as well. I gave him contact information for the Missouri Dept. of Health and Senior Services, and EPA Region 7 for his lead concerns.</p>

Comments We recieved an identical concern yesterday from a different concerned party.

I sent an e-mail to David Hallemann explaining my investigation yesterday:

"Hi David,

We received your environmental concern regarding the property at 9522 Hwy 100 in New Haven, Missouri. We received another concern about this property yesterday, and I investigated it.

The home being demolished is owned by the City of New Haven. I spoke with Kathleen Trentmann, City Administrator yesterday. She explained that it is one single family residence, and that the city has not demolished any other homes in 2021, and does not plan on demolishing any other homes for this project. I double checked with our asbestos enforcement unit in Jefferson City, and verified that if the city only demolishes one home per year, then it falls under the single family residence exemption in federal NESHAPS. Therefore, they were not required to have a certified asbestos inspector survey the home prior to demolition, and were not required to submit a notification to us. I did tell them that they should do everything they can to control the dust, but we have no regulatory authority over the demolition.

Lead, on the other hand, is regulated by the Department of Health and Senior Services and EPA Region 7. I cannot speak to any lead requirements for this demolition. You can contact the DHSS Lead Poisoning Prevention office at 573-751-6102, and the EPA Region 7 at 913-551-7003.

Concern No.	47967	Concern Info	email dated 11/30/21, 5:22 pm					
			<p>There is large scale burning going on a daily/ nightly basis behind our property in a wooded area. Please call me to discuss this or please tell me a time I can reach you along with a good number. I believe illegal burning is continuing- relocating large scale debris from elsewhere to here.</p> <p>If you have access to an aerial map that would help. Afternoons are best if you call me.</p> <p>Thank you, Jennifer Czech 417-342-6682</p> <p>email dated 11/30/21, 10:47 pm</p> <p>I had to call and report the smoke yet again. Just got off the phone 10:42 pm Fire department dispatched to our area...</p> <p>Please help. This is a very serious health hazard. It to mention the dry weather poses a higher danger for it to get out of control.</p> <p>Sent from my iPhone</p> <p>Email dated 11/30/21, 11:26pm</p> <p>We believe the problem is coming from an arborist who lives near us. We live in a rural area and the burning is taking place off of the main road but in very close proximity to the address listed below. Please call me to discuss this further..</p> <p>Thank you, Andy Czech 479-657-0016</p> <p>Business name and address: Action Tree Service 1995 Fletcher Ridge Rd</p>

Concern No. 48025 Concern Info Date of Incident or Date First Noticed 12/03/2021 The entire town and surrounding area stinks, it gives me a headache to be outside. This problem has been occurring more and more frequently. Most people say Opal Foods Chicken manure is problem. People here have also reported the stream leading into fish Hatchery are being damaged and even snakes and fish die. They say DNR won't investigate because Opal is too powerful. It is a health issue. ? Please advise concerned party.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	48041	Concern Info	I received a telephone call from David Parker this morning. He was hired by an owner of 3 buildings 507 S. Main Street, Joplin, MO, to do some contract work. Mr. Parker said he discovered asbestos in the structure he had just begun work on, so he stopped and told the owner he is not licensed to do asbestos work. He said the owner offered more money if he would continue, which he refused. It does not appear this building was inspected for asbestos. Mr. Parker believes the owner will simply make the offer to another non-registered contractor and proceed, so he reached to submit this environmental concern. I offered to show him how to submit the concern online, but he is in the field and does not have his computer. I provided him with the telephone number for the Kansas City Area OSHA Office, since he said there is also a black mold problem at these buildings. Mr. Parker can be reached through his receptionist at 360-644-2567. He would like someone to call and further discuss this environmental concern. I checked our databases and do not have a record of any abatement project notifications, courtesy notifications, or demolition notifications at this address. Thank you,

Concern No. 48070 Concern Info Caller says there is sewer flowing from a mobile home in this MHP and that the manager will not fix the problem. Says the have dug a ditch to allow the sewage to flow away from the MHP. Not sure if this is connected to City of Springfield or not. Caller also says they are demolishing an old home at the entrance of the park and that for years they said it had a lot of asbestos in it. The caller is concerned about what they are doing with that. Park Manager Ethan lives in Lot #17.

Concern No.	48069	Concern Info	I work in the area where the SAMS Club is located in Joplin Missouri / Located near the intersection of I-44 and Rangeline Road. There is periodically a very offensive smell that is outside /comes inside the local buildings and businesses. Not sure where this comes from but there are some industries that are located not too far to the east of this area on East 32nd stree in Joplin. From my understanding there is a developer that is planning on developing this area which would include a MENARDS store, other retail stores and a possible an apartment complex. The offensive Odor is very strong and I would think needs to be addressed for the existing businesses and for the future development of the area. Also from my understanding this Odor complaint has been an issue in the past as well.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 48074	Concern Info I work for the Strafford Fire Protection District in Strafford, Missouri. We have a citizen that owns a large amount of land on both sides of the James River @ St. Hwy 125. Every year he burns off his property in a manner that jeopardizes public safety. When he starts his burn he just lights areas that will utilize the wind to complete the process on a particular tract of land. We have been dispatched to said property at least 3 dozen times in the last 2 weeks for concerns about the fire being out of control, thick smoke making roads impassable, no one out with the fire, citizens with difficulty breathing due to the smoke. We know he is within his rights to burn his property but the issue is that he will not fill out the required burn permits won't call in before he begins so we can alert dispatch, is hostile towards fire personnel when they respond to the property, after lighting leaves fires unattended for days, and has no regard for neighbors concerns when face to face contact is made. I know the county has ordinances concerning fire type legality and overnight burning. Neither our department, or Greene county sheriff's department have the authority to issue any type of citation for this. In the past we have attempted to extinguish the fires but unfortunately where he burns is heavily wooded, with no possibility of getting equipment in so fires must be mitigated by hand crews. This ties up department resources for a considerable amount of time. When he comes back around to check on things if we've extinguished a fire he will reignite it. He owns property on both sides of the river which is the dividing line for our and Logan Rogersville's fire districts. I have listened to their radio traffic and know that it has been an issue for them as well.
